Jewellery Package stands include the following:

- Rolled/ Full lay Carpet
- Unibox Shell scheme consisting of a back wall and two side walls (corner stands have one side wall by default)
- One fascia board carrying your company name
- 1 x 15amp plug point
- 2 x spotlights

Extras including paintable MDF wall panels, display cases, furniture or equipment are available for hire from Scan Display, or your own preferred supplier, at your own cost.

### JEWELLERY PACKAGE STAND GUIDELINES:

**Unibox Shell scheme:** The shell scheme consists of an aluminum frame with white panels slotted in and fascia beams running along the front to keep the structure stable.

Each standard package stand will have a system consisting of a back wall and two side walls, fascia beams and support beams (at intervals not exceeding 3m).

***Due to the nature of the shell scheme it is very important to consult the Technical drawing for accurate dimensions of your stand.***

**Painting or hanging:** Unless you have ordered MDF panels from Scan you may not paint, drill or hammer nails into your standard wall panels. You may not damage the display boards in any way.

You may however use double-sided Velcro, tape, double-sided tape, prestick or vinyl stickers for mounting displays and pictures to the exhibition wall panels.

**Height restriction:** The overall height of the shell scheme is 2.4m, this is the maximum height allowed in your stand unless you get prior written approval from the Expo organisers.

**NOTE:** The design of your stand should in no way affect surrounding stands or go beyond your stand boundaries. Please ensure that any solid structures or displays are presentable from all sides unless placed against the shell scheme walls.
