

## STANDARD PACKAGE RATES

---

Early Bird Rate: R1975 per m<sup>2</sup> excl VAT (**contract and full payment due by 17 August 2011**)  
Normal Rate : R2150 per m<sup>2</sup> excl VAT

Standard Package Stands include the following:

- Carpet
- Unibox Shell Scheme consisting of a back wall and two side walls (corners stands have 1 side wall by default)
- One fascia board carrying your company name
- 1 x 15amp plug point
- 2 x spotlights

**Unibox Shell Scheme:** The shell scheme consists of an aluminum frame with white panels slotted in and fascia beams running along the front to keep the structure stable.

Each standard package stand will have a system consisting of a back wall, two side walls, fascia beams and support beams (at intervals not exceeding 3m). By default, corner stands will have only 1 side wall.

**Painting or hanging:** Unless you have ordered MDF panels from Scan you may not paint, drill or hammer nails into your standard wall panels. You may not damage the display boards in any way. You may however use double-sided Velcro, tape, double-sided tape, prestick or vinyl stickers for mounting displays and pictures to the exhibition wall panels.

**Height restriction:** The overall height of the shell scheme is 2.4m, this is the maximum height allowed in your stand unless you get prior written approval from the Expo organisers.

**Design guidelines:** The look and feel of the expo floor has been designed to create a very open and inviting space that is enforced by the large number of corner stands. This reduces the box-like feeling sometimes created by shell scheme and allows you a greater flexibility when designing your space.

**NOTE:** The design of your stand should in no way affect surrounding stands or go beyond your stand boundaries. Please ensure that any solid structures or displays are presentable from all sides unless placed against the shell scheme walls.
